RE: Request for Extension of Development Schedule G2-28335

Dear Ms. Brown;

This letter is to request a 5-year extension of time for putting water to full beneficial use under water right permit G2-28335. This permit authorizes use from our Well #2.

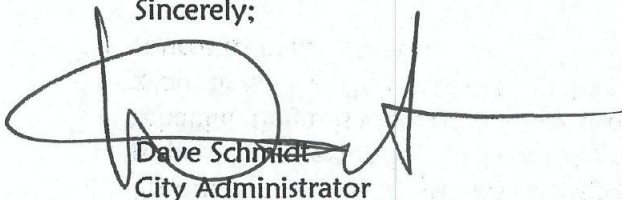

Production in Well 2 has declined significant in last several years, and the City is requesting an extension because we are currently investigating our options for either rehabilitating this well, or possibly constructing a replacement source. Use of groundwater wells is critical for peaking supply, and we anticipate needing full use of this source to meet future need.

The City of Buckley is a municipal water system operating in compliance with it's Department of Health approved 2005 Water System Plan. The system currently serves water to a population of approximately 4,500 residents with a projected 2012 population of 6,637. The need to conduct additional testing, and possibly construct additional sources has been identified in our water system plan.

We are committed to pursuing this water right with due diligence, and anticipate full beneficial use of the water within the next 5 to 7 years.

Please find enclosed our check for \$50, and if you have any questions please feel free to contact me at Buckley City Hall. Thank you.

Sincerely;

Dave Schmidt
City Administrator
